JAYESH BACCHAV

Data Analyst | SQL, Power BI & ETL

jayeshbacchav9@gmail.com |+91 8554027379 | linkedin.com/in/jayeshbacchav9 |github.com/Jayesh23B

PROFESSIONAL SUMMARY

Early-career Data Analyst with hands-on experience in **Data Analytics, ETL Workflows, and Business Intelligence**, with strong foundations in **Python and SQL**. Proficient in building **data pipelines, dashboards, and reporting systems** using **Excel and Power BI**. Experienced in transforming raw data into actionable insights for **KPI tracking, MIS reporting, and business decision-making**

SKILLS

• **Data Analysis & Business Intelligence:** Advanced Excel (Pivot Tables, Power Query), Power BI (DAX, Dashboard Development), KPI Tracking, MIS Reporting
• **Data Engineering & ETL:** Data Pipelines, ETL Workflows, Data Cleaning, Data Transformation, Data Integration, Data Quality
• **Programming & Query Languages:** Python (Pandas, NumPy), SQL (MySQL, SQL Server)
• **Analytics & Techniques:** Exploratory Data Analysis (EDA), Trend Analysis, Variance Analysis, Statistical Analysis
• **Tools & Platforms:** Git, GitHub, Airflow, Power BI, MySQL, PostgreSQL

PROJECTS

HR Analytics & Workforce Insights (SQL & Power BI)

- Built an end-to-end **data analysis pipeline using SQL (CTEs and Window Functions)**
- Designed and implemented **ETL workflows** to clean, transform, and integrate multi-source HR data
- Handled real-world messy and unstructured data, optimizing it for **analysis** and **business reporting**
- Developed **Power BI dashboards with KPIs** to track attrition and performance trends
- Identified **high-risk attrition segments** for workforce planning

Customer Profitability & Revenue Analysis (Power BI)

- Developed a **profitability analysis model** integrating revenue and cost datasets
- Performed **data cleaning and transformation using Power Query** to prepare structured datasets
- Built **interactive Power BI dashboards** with DAX to track YoY, YTD, and variance in financial metrics
- Generated insights on **customer segmentation and regional** performance to support business decisions

Payment Intelligence System (SQL, Python & Power BI)

- Built an end-to-end **data analytics system** for transactional data analysis
- Designed **ETL pipelines** to clean and structure raw data
- Performed **SQL-based analysis** to identify trends, high-value customers and risk patterns
- Developed **dashboards and reports** for business insights and support decision-making
- Improved reporting efficiency through **automated workflow**

EDUCATION

Bachelor of Engineering – Artificial Intelligence & Data Science (CGPA: 7.48)
MET BKC Institute of Engineering, Nashik (2021 – 2025)

CERTIFICATIONS

IBM Data Science Professional Certificate | Zensar Python Developer | AI Operations Training
